DIBELLA
LONGLIFE TEXTILES

Our assortment:

- Bed linen [From page 12](#)
- Terry Towels [From page 54](#)
- Table linen [From page 68](#)
- Kitchen linen [From page 68](#)

Our Good Textiles range ...
 ... can be found integrated in the respective qualities.
 Fair and environmentally friendly contract textiles
 produced and certified according to the highest
 sustainability standards, such as GOTS and Fairtrade.

"End of life" solutions:
 Recycling opportunities
 through CIBUTEX [From page 76](#)

Dear customers,

How good is actually good enough? The topic of sustainability is moving more and more into the consumer's focus - not least because of the entry into force of the Supply Chain Sourcing Obligations Act (Lieferwarpnsorgfaltspflichtengesetz) at the beginning of this year and the associated reporting obligation for companies with 3,000 or more employees. Where do the raw materials come from, how are they processed? And above all, where and by whom? Are environmental guidelines and occupational health and safety complied with?

The textile supply chain is very complex and involves many processing steps.

In our Good Textiles range, the standards required for the Fairtrade and GOTS certification are not only met, but in many cases exceeded. With Dibella textiles certified with the Green Button, you already fulfil the corporate due diligence obligations. If you have any questions on this complex topic, we will be happy to advise you.

Dibella knows its suppliers; we have maintained trusting business relationships for many years. The topic of sustainability is not just a trend for us, but is deeply rooted in our convictions. So we reliably offer you the security that your customer demands from you, even in our standard range. Dibella works with its own standards for the requirements placed on suppliers. We voluntarily draw up a sustainability report and a public welfare balance sheet and attach great importance to transparency.

This commitment is evidenced by numerous recognised certifications. Our products meet the OEKOTEX® MADE IN GREEN criteria. In addition, a large proportion has been awarded the Green Button and also the EU Ecolabel.*

Trust in the textile supply chain combined with our quality promise and a service that is binding at all times: Dibella is simply particularly good.

But in the meantime we also offer solutions after the end of life of our textiles. The cooperative CIBUTEX, founded at the beginning of 2022, offers solutions for reuse and upcycling. For recycling and upcycling. And – for the first time – we offer completely circular bed linen in our range.

If you have any questions, special requests or comments, please do not hesitate to contact us directly.

Sincerely
Your Dibella Team

For reasons of better readability, the simultaneous use of the masculine, feminine and the language forms male, female and diverse (m/f/d). All personal terms apply equally to all genders.

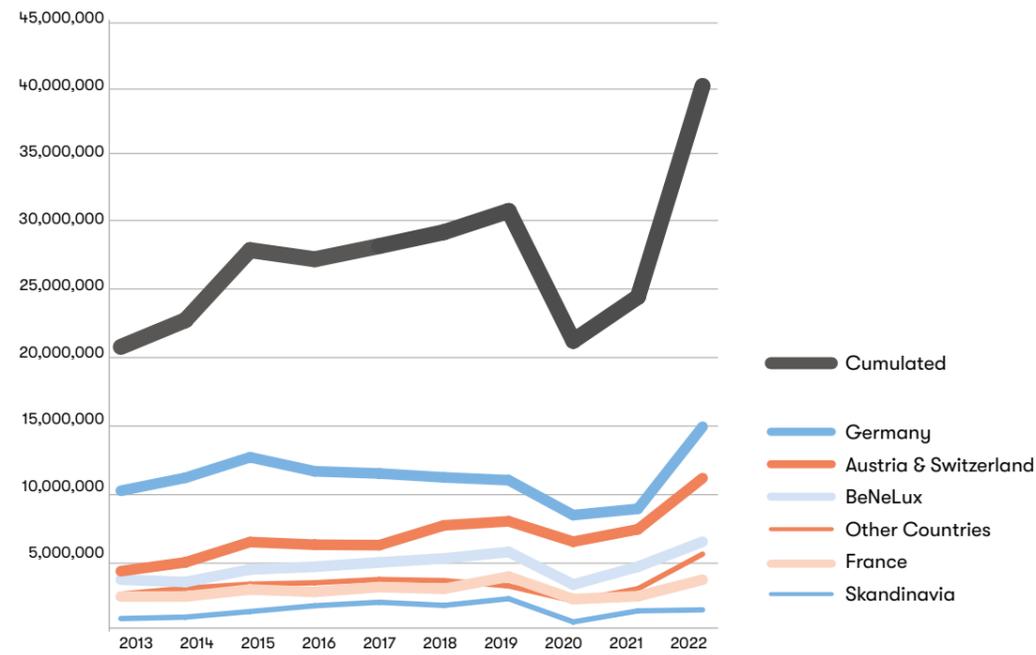

* An overview of our certifications is available on our website or simply by website or simply by scanning this QR code:

We not only know our suppliers, but also regularly visit our organic Fairtrade cotton farmers, who supply the raw materials for the Good Textiles range. Join us on one of our business trips to India.

OUR SUPPLY CHAIN

Bed linen

You will receive our bed linen in 100 % cotton:

- Natural raw material
- High moisture absorption
- Pure cotton can be processed very easily and reintroduced into the cycle

and made of blended fabric:

- Particularly long service life
- Energy savings in reprocessing

Bed linen from Dibella has been specially designed for use in textile services for industrial laundering.

Special features in the material composition and construction of the fabric ensure high process reliability and maximum service life.

The selected fabric blends, developed by our specialists and continuously checked by our quality management, maintain an optimal appearance, high brilliance and pleasant comfort throughout their entire usage cycle.

- Zero Pre-wash > No separate pre-wash necessary
- Easy Ironing > Efficient ironing results
- Low Shrinkage Effect > Reduced shrinkage
- Easy Identification > Identification by attaching latest chip technology
- Brilliant White > Stable high whiteness
- Low Pilling > Outstanding gloss and excellent touch

Sustainability in practice

- > Textiles without residues hazardous to health
- > Ethical added value via the fair textile value chain down to the smallest farmer

* Textile Exchange 2014

Our hotel textiles. Sustainable. Fair. Good.

For our particularly sustainable textiles, we at Dibella combine the high standards of GOTS and FAIRTRADE. The social and environmental standards of these two independent organisations apply along the entire cotton value chain. The result is textiles that are produced sustainably and fair.

Sustainable textiles protect health and the environment - both at home and in the country of origin. The farmers cultivate their fields ecologically, without the use of dangerous pesticides and free from genetically modified seeds. Strict environmental standards are observed in the factories. For example the use of hazardous chemicals is banned, and waste water is treated.

Sustainable textiles improve the living and working conditions of many people. Fair trade enables small farmers in the global south to earn a higher income. Defined social standards also apply to the processing of cotton. Neither child nor forced labour is permitted in the factories. High standards of occupational safety, fire prevention and evacuation regulations are reliably implemented.

Simply good! Good Textiles.

TENCEL™ pillowcases and duvet covers

60% TENCEL™, 40% cotton,
ring yarn, combed, mercerised, white, 150 g/m²

Virginia

Plain satin,
thread count TC 250

Lyocell – also known as **TENCEL™** – is a so-called "man-made cellulose fibre", i.e. a fibre industrially produced from natural raw materials. It is made from wood from forestry and is completely degradable in soil, compost and also in freshwater and seawater.

Botanical origin

TENCEL™ Llyocell and modal fibers come from the renewable raw material wood – from natural forests and sustainably managed plantations. The wood and the pulp used by the Lenzing Group come from certified and controlled sources.

Measurements and hand assessments show that TENCEL™ modal fibers are twice as soft as cotton. The softness of TENCEL™ modal fibers lasts longer and withstands repeated washing and drying compared to cotton.

Sustainable production of TENCEL™ Lyocell fibers

TENCEL™ Lyocell fibers have made a name for themselves because of the environmentally conscious closed-loop manufacturing process that converts pulp into cellulose fibers with high resource efficiency and low environmental impact. This solvent spinning process recycles the process water and returns more than 99% of the solvent to the production cycle.

Table linen

The high-quality textiles are produced with great expertise, ensuring stable production processes and long service lives in industrial laundering.

The range of dimensionally stable shapes and washable colours allows trouble-free handling of the textiles in the complete production process, including use by the customer.

- Twisted Yarns > Manufactured from durable full-twist yarns
- Round Fit > Specially produced, ironing direction marked
- Yarn-dyed > Identical colours for different sizes
- Combed Cotton > Combed quality yarns
- Mercerized > Increased gloss
- Closed Selvedge > Efficient ironing results by using closed selvages

Responsibility along the entire supply chain: circular economy at Dibella.

Dibella ensures compliance with the requirements of the Supply Chain Sourcing Obligations Act with the OEKOTEX® MADE IN GREEN and Green Button certifications. But we also bear responsibility after the end of the use cycle in textile services. As a founding member of the CIBUTEX cooperative, we ensure that used textiles from the laundry industry are returned to a new, circular cycle in order to make the entire textile chain more sustainable.

Our motto: Circularity through cooperation

Mission and vision

We want to take responsibility and bring textile recycling to a new level. Our vision is: from textile to textile. Through upcycling we want to new textiles for our industry.
